

The municipal finance platform, built — not just promised.

Tiro Digital helps South African municipalities run the full municipal cycle — IDP and budget, billing and revenue, procurement, assets, MBRR reporting and the audit file — on one working platform, backed by hands-on advisory. We build the software, do the advisory, and stay until your data string is credible to National Treasury and the Auditor-General.

- mSCOA-native
- MFMA-aligned
- NT-ready outputs
- Audit trail & tenant isolation

THE PLATFORM — EIGHT SUITES, THIRTEEN MODULES

One chart, one audit trail — every module from planning to payment talking to each other. Everything below is in the product today: the built map, not a roadmap.

■ PLANNING & PARTICIPATION

IDP — objectives, KPAs, public participation, council adoption · Budget (MTREF) — mSCOA-native ORGB/TABB/ADJB cycles, virements, DORA grants, commitment control (MFMA s15/s32) · SDBIP — delivery targets, quarterly tracking, scorecards · Public IDP comment portal (MSA s29)

■ REVENUE & BILLING

Consumer accounts · Tariffs & block tariffs · Meter walks & reading batches · Billing runs → consumer statements · Credit control, debt collection & indigent / free basic services (FBS)

■ FINANCIAL CORE

General ledger — journals & period control · Accounts payable & receivable · Cash book & bank reconciliation · EFT payment runs · Investment register

■ PROCUREMENT & CONTRACTS

SCM / Expenditure Pack — requisition → RFQ → BEC/BAC → award with separation of duties · MBD declarations & three-way match · UIFW register with ratification · Contract register — commitments & expiry · Configurable workflows & forms · Tamper-evident, hash-verified audit packs

■ ASSETS

GRAP 17 register & depreciation runs · Verification, condition assessment & disposal · Asset Management Strategy & Plan · Maintenance feeds & reconciliation

■ REPORTING & STATEMENTS

Reporter — the NT v7.1 MBRR pack (A / SA / SC schedules, s71/s72) with mandatory reconciliation gates before anything leaves for NT · Financial Reporting — GRAP AFS from trial balance + journals, disclosure notes, auditor (PBC) pack · Document Builder — budget books, council reports & AFS from live platform data

■ GOVERNANCE & ASSURANCE

Risk register with mitigation tracking · Compliance calendar for statutory deadlines · AGSA audit-findings tracking with evidence · Certificates · Records management with retention rules

■ INTELLIGENCE & INTEGRATION

Tso — the built-in AI assistant: briefings from your municipality's own data, drafts, human escalation · Supplier portal — MBD forms online · ERP adapter framework & ingest APIs · Municipal website CMS & go-live migration

WHAT WE DO

- **Advisory** — mSCOA & MFMA compliance, data-string credibility, NT submissions
- **Reporting** — MBRR schedules, s71/s72 packs and A-SC tables that reconcile
- **Training** — masterclasses & hands-on upskilling for finance teams and CFOs
- **Implementation** — the platform live in your municipality, configured to your chart
- **Diagnostics** — data-string & chain-credibility reviews before NT says no
- **Support** — ongoing updates that track every new regulation and NT change

WHO WE SERVE

District & local municipalities · CFOs & the Budget & Treasury Office · finance & budget teams · internal audit & SCM units

WHY TIRO

Built, not promised

a working app, not a roadmap or a pitch deck

mSCOA-native

designed around the chart and NT rules from day one

Founder-led

direct expertise and fast turnaround — no call-centre queue

Compliance-first

every output ties back to MFMA, NT and an audit-ready trail
